# WIND CHILL

The CDC provides the following information on wind chill: The wind chill index is the temperature your body feels when the air temperature is combined with the wind speed. It is based on the rate of heat loss from exposed skin caused by the effects of wind and cold. As the speed of the wind increases, it can carry heat away from your body much more quickly, causing the skin temperature to drop. When there are high winds, serious weather-related health problems are more likely, even when temperatures are only cool. The wind chill chart (right) shows the difference between actual air temperatures and perceived temperatures and the amount of time until frost bite occurs.

Have fun but be cautious when doing recreational activities outdoors. Always notify family and friends of your plans and whereabouts when headed out to play. Do not leave areas of the skin exposed to the cold. Avoid over-exertion and perspiring. Always pack dry clothing and be prepared to seek emergency shelter if needed.

During the winter months, make sure to check on elderly family members and neighbors. Don't forget about plants and animals too!

# BE WINTER READY

## Make a Mobile Ready Kit for Winter

## FOR THE CAR...

Building an emergency supply kit for your car is just as important as an emergency kit for your home. Why? Because you never know when you will encounter winter weather or an emergency road closure. A mobile kit can include things like: a cell phone charger, first aid kit, jumper cables, blanket, boots, gloves, hat, warm clothes, a flashlight, water and snacks, along with a full tank of gas. You may also want to consider having flares, tow rope, tire chains or snow tires, bag of sand or cat litter, shovel, ice scraper or snow brush.

Winterizing your vehicle is also important. During the fall, before winter sets in, make sure you or a mechanic completes a winter weather check. Check things like: anti-freeze levels, battery and ignition system, brakes, exhaust, fuel and air filters, oil, thermostat, heater and defroster, lights, windshield wipers and tires.

Planning ahead for winter weather is just plain smart! Find more information at [www.ready.gov/prepare](http://www.ready.gov/prepare)

## HOW WILL I KNOW IF CAMPUS IS OPEN, CLOSED OR DELAYED?

Check the following resources to determine whether the University is open, closed or delayed due to inclement weather.
