# Crisis Coordinator Communique

## Kaboom!

A couple of times a week (usually Tuesdays and Thursdays around 11am) the Kennesaw Campus can hear, and sometimes feel, the “Vulcan Blasts.” This is not an attack on the USS Enterprise! Vulcan Materials Company is the nation’s largest producer of construction aggregates—primarily crushed stone, sand and gravel—and a major producer of aggregates-based construction materials, including asphalt and ready-mixed concrete. Several Crisis Coordinators have asked if they could be added to Vulcan’s Blast Notification distribution list. If you would like on this list, simply send an email to [oem@kennesaw.edu](mailto:oem@kennesaw.edu), and include your name, phone number and email address. OEM is taking a short tour of Vulcan (“just down the road” from the Kennesaw Campus) on August 7 at 9am email Andy at [andy\\_altizer@kennesaw.edu](mailto:andy_altizer@kennesaw.edu) if you would like to join us.

## Suggestions

As we are moving into the Fall Semester we are looking to begin hosting more classes. If there is a specific topic that you and your office are interested in, please let us know and we can host it. Suggestions could include classes we already offer or special topic classes. On the Kennesaw Campus, reach out to Christy Hendricks at [dhendr16@kennesaw.edu](mailto:dhendr16@kennesaw.edu), and on the Marietta Campus reach out to Mike Guerrero at [mguerre8@kennesaw.edu](mailto:mguerre8@kennesaw.edu).

## Campus Safety Days

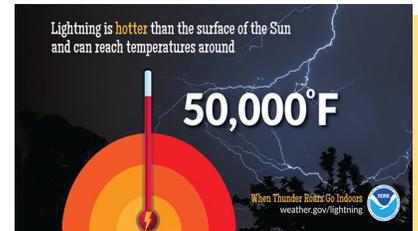

The Office of Emergency Management will continue to host two campus safety days per year, on both the Marietta and Kennesaw campuses. However, **starting this year they will both be during the fall.** In the years past, the Fall semester Campus Safety Day was held on the Kennesaw Campus, and the Spring Campus Safety Day was held in Marietta. We will now be hosting both in the Fall in observance of National Preparedness Month. This year the **Kennesaw Campus Safety Day** will be **October 9, 2018 from 11:00 AM to 2:00 PM**, and the **Marietta Campus Safety Day** will be **September 6, 2018 from 11:00 AM to 2:00 PM**. We look forward to seeing you there!

## Hands Free Driving in Georgia!

The Georgia Hands Free Driving Law (OCGA Code Section 40-5-57) took effect July 1, 2018. This means a driver cannot have a phone in their hand or use any part of their body to support their phone. Drivers can only use their phones to make or receive phone calls by using speakerphone, earpiece, wireless headphone; phone is connected to vehicle or an electronic watch. GPS navigation devices are allowed. Headsets and earpieces can only be worn for communication purposes and not for listening to music or other entertainment. A driver may not send or read any text-based communication unless using voice-based communication that automatically converts message to a written text or is being used for navigation or GPS. Stay safe and legal by following this new law!

FINKE ©2018 THE AUGUSTA CHRONICLE 5/5  
COGICCARIBONS.COM

Lightning strikes the United States about 25 million times a year. Although most lightning occurs in the summer, people can be struck at any time of year. Lightning kills an average of 49 people in the United States each year, and hundreds more are severely injured. <https://www.weather.gov/safety/lightning>
